ROSES

From Sunny
California

Gardeners nationwide, who really know their plants, will tell you that California-grown roses are the best in the country. Nature has provided California with ideal rose growing conditions. And at Armstrong's Nature is given a big assist by up-to-the-minute cultural practices, controlled irrigation with pure well water, and many years of rose growing experience. Because of their extra size and vigor and because of the special rootstock, available only with western-grown roses, these plants will actually out perform roses grown in other soils and climates.

By Mail is The Best Buy

One of the surest ways of getting the finest rose plants obtainable is to order them by mail directly from the grower—especially if you order from a reputable mail order concern. We are proud of the fact that Armstrong Nurseries is numbered among the leading mail order nursery firms of America. We are proud, too, that now, as has been the case for over half a century of mail order service, Armstrong customers are getting the finest plants that it is possible to grow.

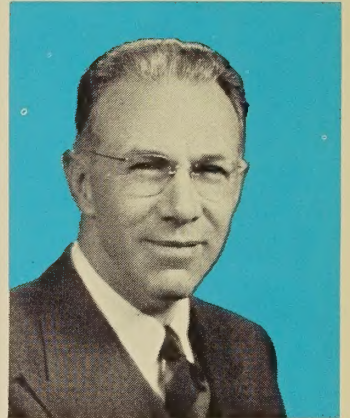

There are benefits other than quality for the mail order rose buyer. You shop leisurely at home from a colorful catalog. There is plenty of time to choose wisely and an opportunity for the entire family to share in planning the rose garden. Then, too, there is the convenience of having the plants delivered right to your door at proper planting time.

Your Armstrong catalog offers you a wider selection—all the latest and most desirable varieties. Plants are shipped freshly dug right out of our fields, or from special storage facilities where controlled temperature and humidity keep them in field-fresh condition. Modern packing techniques, today's fast mail service, and a guarantee of safe arrival make ordering by mail from Armstrong safe and sure for you.

All of the roses in this catalog are Armstrong-grown and many are also Armstrong originated. The Armstrong Research Department is responsible for creating many of the world's best and finest roses. At its head, is David L. Armstrong, one of the third generation of Armstrong rose specialists.

Dear Friend and Customer:

As I write this, I am looking from my window over fields of roses in full bloom—plants which are maturing now for sales this season. But what is *underneath* all of the bloom impresses me most. The big husky plants make me realize with immense satisfaction that our rose men have grown another outstanding crop.

There is a lot of satisfaction, too, in knowing that our Research Department has given us some very fine new roses in Aztec and Starlet, which are offered for the first time in this catalog. Also, we've a fine new rose from England in Isobel Harkness.

As always, in all of our growing and shipping operations, we are endeavoring to provide you with plants of the highest quality, and to give you careful conscientious service. Expect these things when you order from us, whether you are a new customer or an old one.

J. Rodney Armstrong

Guarantee of Armstrong Quality

If you follow the simple instructions on proper planting contained in the guide which you will receive with your Armstrong roses, and providing that the plants have not been exposed to abnormal weather or damaging factors beyond our control, rose plants sold by Armstrong Nurseries are guaranteed to live and bloom.

Under the above conditions, we will replace without charge any rose which fails to grow and bloom in your garden if you notify us of its failure within six months after the rose is delivered to you.

Five Types of Roses

Nearly every one of our modern roses falls into one of five classes or rose types. Here, briefly, are some of the characteristics of the five.

Hybrid Teas

Pages
7 to 25

Hybrid Teas play the leading role in every rose garden. Excellent form in both bud and bloom, large flower size, long sturdy stems, and often a rich fragrance, are the qualities which make them particularly appealing for cutting and arranging as well as for garden decoration. The unusual and rich colors to be found among some of the newer introductions make today's Hybrid Teas more glamorous than ever.

Grandifloras

Pages
26 and 27

The outstanding feature of this new class is that they flower with near miraculous profusion, often in clusters with each bloom a high-centered beauty on a good stem. For a show of garden color and a wealth of fine long-lasting flowers for cutting, Grandifloras are unbeatable. Secondly, Grandifloras are among the easiest of all roses to grow because of their great vigor.

Floribundas

Pages
28 to 34

"Floribunda" means lots of flowers, and that is just what you get with these new cluster-flowering roses. They have many garden uses with their almost unbelievable show of color displayed throughout the entire season. Plant them singly, mass them for color, or use them as a hedge or walk edging. Bright new colors and a variety of plant sizes give you a wide choice.

Climbers

Pages 35 to 39

Climbing roses will quickly cover a pergola or arbor, beautify a wall or fence, or hide an unsightly view. A size and type for most any garden spot may be found among the big large-flowered Hybrid Tea sports or in the smaller, often everblooming Pillar types.

Tree Roses

Page 23

Standard or tree-shaped roses are excellent for garden accents, as a bright spot in a shrub border or for eye-level color anywhere in the garden. They are grown by budding the desired variety into a special stock which makes the tall straight trunk. The bushy head is about 3 feet above ground level and usually loaded with bloom.

Planting guide free with every purchase

Every shipment of Armstrong roses is accompanied by a copy of the Armstrong Planting Guide. This carefully compiled booklet sets down for you simply, yet thoroughly, the step by step instructions on the proper care and planting of your roses. Follow it and you'll find it easy to make your Armstrong roses the envy of the neighborhood.

Grow the Best—Armstrong Roses

Thousands of letters from pleased customers all over America have told us that Armstrong roses have been the best performers in their gardens. Expert rosarians too, have said, "Yours are the best roses I have ever received from anywhere." Regardless of your soil and climate, you, too, will find these big, vigorous, strong-rooted plants best for you.

Planting Time

The season for shipping Armstrong roses commences right after Thanksgiving. From then, the shipment of field-fresh plants continues without interruption until about May 1. Orders are acknowledged as rapidly as possible after they are received, with each acknowledging invoice indicating the approximate shipping time—the time we believe to be most favorable for planting in your area. We check the weather closely in all parts of the country and try to get your roses to you so that you can plant them immediately upon arrival. In general, we recommend the following regional planting times, although these may vary somewhat from this schedule depending upon the locality.

NORTHEASTERN & NORTH CENTRAL STATES. Planters in these colder sections usually get best results by setting out fully mature plants in the spring (late March to early May).

MID-ATLANTIC STATES. The season varies somewhat, but generally late February, March and early April are best.

MIDWESTERN STATES. Depending upon the duration of freezing conditions, from mid-March to early May.

GULF STATES. Planters in Florida and the southern parts of the Gulf States can set out the first plants ready for shipment (in December) with excellent results. Spring planting, too, has proved very successful in many of these areas, excepting Southern Florida.

SOUTHERN STATES. In warmer areas, the first roses ready for shipment (in December) may be planted. In localities removed from the Gulf of Mexico, it is best to plant a little later (January to March) because of the danger of sudden sharp cold spells.

SOUTHWESTERN STATES. In parts of Arizona, New Mexico, Nevada, Texas, and California—the more arid and desert regions of the Southwest—roses should be planted early (December and January). At the higher altitudes, February to March are best depending upon the altitude and likelihood of late frosts.

When to Order

To be most sure of getting the roses you want, your order should be sent to us when you receive this catalog. We will reserve your plants for you and ship them at proper planting time. The shipping time and varieties reserved will be noted on the order acknowledgment, which will be sent to you right after we receive your order.

Roses in Containers

In the late spring, summer and fall, many of the roses in this catalog are available in containers. They are blooming and ready for immediate planting. The prices are somewhat higher than the bare root prices listed in this catalog. These plants are available only in our five Southern California salesyards. They are uneconomical to ship because of weight and bulk.

Free Planting Instructions

The carefully prepared booklet on the planting and care of your Armstrong plants is sent free with each shipment. You'll find the instructions clearly and simply outlined. Just follow them and you'll enjoy happy gardening.

About Our Rootstock

Because of its great vigor and remarkably good performance in all types of soil and under widely varying conditions of climate, Dr. Huey is proving to be the ideal rose understock. It is the rootstock used exclusively in growing Armstrong roses.

No Blackspot

Blackspot of roses is not a problem in California, so you can be sure that the roses you get from Armstrong's will be free of this troublesome disease when you receive them for planting.

Quantity Discounts

By ordering 3 or more plants of a single variety or by taking advantage of the special 12 and 25 rates on Floribundas, you save substantially over what the same plants would cost if purchased singly. The special collections are sold at a big saving, too. Please do not ask us to substitute varieties in collections—they are available only with the varieties indicated.

Price Changes

We hope to be able to maintain the prices quoted in this catalog throughout the sales season for which it applies. However, should a price change be necessary for some unforeseen reason, we reserve the right to change any of these prices at any time without notice. The prices on plants apply to the current crop only and will not be effective after May 15, 1958.

Roses for Export

Roses shipped to countries other than the U.S. or its possessions travel at the customer's expense for both transportation and documentary charges. Air travel is most satisfactory and we will gladly furnish an estimate of costs on the plants in which you are interested. It is not possible for us to send any of the newer patented varieties to Great Britain, Continental Europe, The Union of South Africa or New Zealand.

Fine foliage & stems

Very free-blooming

An outstanding new yellow Hybrid Tea from Great Britain. It is an origination of Mr. Albert Norman, one of England's best known rosarians, and a rose which Armstrong is happy and proud to introduce to American planters.

An Outstanding Yellow

Isobel Harkness is a YELLOW rose—bright and shining—one of the best large-flowered yellows ever introduced. The buds are large, long, beautifully formed, and the broad-petaled open blooms have neither shadings nor variations to mar the clarity of the bright shining color. You need no special “green thumb” to grow Isobel Harkness. The sturdy, free-branching, beautifully foliaged plant grows vigorously and your reward is great numbers of brilliant blooms on long stout stems. Plant Pat. App. For.

BEAUTIES FOR 1958

Hybrid Teas

White Knight

Pure white—clean and clear

Fine blooms in cool weather or warm

Long pointed buds—beautiful double blooms

Upright plant, medium height

The good looking plant is always highlighted with aristocratic buds and elegant, high-centered blooms (35 or so petals). In quality and quantity of bloom, this rose richly deserves its All-America honor. White Knight is an immaculate WHITE. It opens white, even in cool weather, and in typical Sir Galahad manner, it remains pure and unblemished until the last petal drops. Plant Pat. No. 1359.

\$3.00 each; 3 for \$7.95; 12 for \$31.80.

AMERICA COLLECTION

"All-America Selections" in itself literally means "the best in roses." And when you choose the best from the greatest winners in All-America history, as we have done in this All-America Collection, you can be sure you are getting the finest which rosedom has to offer.

Mojave

Glowing sunset-orange

Long tapering buds

Very free-blooming

Erect medium height

Long stout stems

Does well everywhere

Mojave is not only an All-America Winner (1954), but was awarded Gold Medals in the most important European Trials as well. It is the finest rose in its color class—the scarlet-orange and vermillion of a Mojave desert sunset. Plant Pat. No. 1176.

Mojave

Glowing sunset-orange

Long tapering buds

Long-lasting blooms

Blooms very freely

Vigorous erect plant

Long stout stems

Mojave was the "rose in the news" in 1954. An All-America Winner (U.S.), a Gold Medal Winner at Bagatelle (France), and a Gold Medal Winner at Geneva (Switzerland). We think Mojave is the finest orange colored rose ever introduced because of its fine color, beautiful buds, long-lasting qualities. In cool weather the color is a brilliant match for the fiery oranges, reds, and vermilions which you see in a growing desert sunset. Plant Pat. No. 1176.

Vigorous, free-blooming

The unfading red blooms in large loose clusters have fine form and last well when cut. This rose was awarded the Gold Medal of the American Rose Society in 1955, and has continually ranked among the highest in the Society's annual poll. Plant Pat. No. 1066.

\$2.00 each; 3 for \$5.25; 12 for \$21.00.

Roundelay

Rich glowing red
Very double 4-in.

Roundelay
Fragrant, long-lasting
Tall, disease resistant

A vigorous, easy-to-grow Grandiflora—one we think is the best red in its class. This will give you more beautiful red roses than any other variety we know. Every rose will be a perfect long-lasting and fragrant beauty on a single stem for cutting. Plant Pat. No. 1280.

\$2.50 each; 3 for \$6.60; 12 for \$26.40.

Queen Elizabeth

Lovely, orchid pink
Beautiful foliage

Tall robust plant
Grows easily

It's a delight to watch the plant of this All-America Winner for 1955 shoot upward almost before your eyes, and sheer joy to cut the lovely, long-lasting 4-in. blooms on long, almost thornless stems. Plant Pat. No. 1259.

\$2.50 each; 3 for \$6.60; 12 for \$26.40.

Buccaneer

Clear bright yellow
Long tapering buds

Tall upright plant
Extremely vigorous

It's the brightest, clearest, and "lastingest" yellow you've ever seen in a rose. The beautiful streamlined buds and golden blooms, up to 4½ in. across, are held proudly above the heads of other rose plants on fine long stems. Plant Pat. No. 1119.

\$2.50 each; 3 for \$6.60; 12 for \$26.40.

Queen Elizabeth

Buccaneer

Floribundas

These spectacular cluster-flowered roses are hardy to cold, vigorous, and easily cared for. They will provide an almost unbelievable show of color from early spring until very late fall —superb for a mass of color, or make a breath-taking hedge or border covered with roses. Many are fine as a source of cut flowers, too. Plant heights will average somewhat lower than shown in coldest areas with shorter growing seasons.

The New Ones For 1958

Fusilier Starlet Gold Cup

Fusilier

1958 All-America Winner
Vivid scarlet-orange
Double blooms, 2½-3 in.

Tall plant, 3-ft.
Densely foliated
Vigorous, easy to grow

This new All-America choice for 1958 should find favor with gardeners everywhere because of its ability to grow well, its good foliage, and its habit of dropping old flowers cleanly. It's an erect "soldierly" plant nearly always at "dress parade" uniformed in the brightest gayest color imaginable. Plant Pat. App. for.

\$2.50 each; 3 for \$6.60; 12 for \$26.40; 25 for \$50.00.

Starlet

Gold Cup

1958 All-America Winner
Lasting golden yellow
Medium blooms, 3½-in.

Low spreading plant
Fine glossy foliage
Resistant to mildew

A clear shining yellow color, which is both rich and unfading, is the most impressive feature of this new Floribunda. And the color is displayed in buds and blooms which are well spaced over the plant. Gold Cup is a variety which has had to prove its good performance in all areas to justify its nomination for All-America honors. Plant Pat. App. for.

\$2.50 each; 3 for \$6.60; 12 for \$26.40; 25 for \$50.00.

Fusilier

Gold Cup

STARLET

New Armstrong Floribunda

Clear buttercup yellow
Perfect little buds
Very double blooms, 2½ in.

Low rounded plant
Fine abundant foliage
Flowers all season

For years every rose hybridizer has been hoping for a good Floribunda with flowers of clear shining yellow, and here it is! Because of the cluster after cluster of sunny yellow blooms, and because the plant's rounded low habit makes it just right for many garden spots, we predict that Starlet will become a "leading lady" among yellow Floribundas. Pat. App. for.

\$2.50 each; 3 for \$6.60; 12 for \$24.00; 25 for \$47.50.

ROSE OF 1000 COLORS

Circus

All-America Winner 1956
Ever-changing colors
Shades of red, yellow, orange, pink
Compact, medium, 2-2½ ft.
Vigorous and free-blooming

Circus is a Floribunda with a multitude of uses and oceans of appeal. It's a show of color with more thrills than the "big top." Almost as you watch, the golden buds change color to tones of buff, pink, then finish with a flourish of bright red. The well rounded free-blooming plant is perfect for beds, borders, hedges or massing. Plant Pat. No. 1382.

How Many Plants

To help you determine how many rose plants you need for a specific spot, here are some approximate formal or rose bed spacings recommended for the South and West.

Low Floribundas	1½ to 2 feet
Medium Floribundas	2 to 3 feet
Large Floribundas	3 to 4 feet
Hybrid Teas	3 to 4 feet
Grandifloras	3 to 5 feet

In the North, Midwest, or East, where the growing season is shorter, spacing may be reduced about ½. Where a solid hedge or mass effect is desired, Floribunda spacing can be reduced.

Climbers

When it comes to staging a breath-taking show of garden color, climbing roses are garden champions. A small space for the root system is all you need to set a fence, trellis or arbor aglow with spring color—you can beautifully cover a wall or unsightly place with masses of luxuriant foliage studded with myriads of colorful blooms. Usually the climbing forms of bush types will display larger blooms on longer stems than will their garden sisters.

Climbing Charlotte Armstrong

Carmine red to cerise
Large flowers to 6 in.

Flowers and fruit of Saturn

Saturn Peach

Every spring each branch of the big vigorous tree is crowded with beautiful, double, rose-pink blooms. They make a magnificent show of color and provide plenty of flowering branches to cut for the house. Then in mid-summer, your tree will be loaded with big, yellow-fleshed, freestone peaches—so good Saturn is worth growing for its fruit alone. There is just the right amount of tang to make the rich peach flavor extra tempting. Plant Pat. No. 1485.

\$3.50 each; 10 for \$31.50.

Double Delight Peach

A brand new fruiting-flowering peach to be sold for the first time in 1958. It is a perfect companion for Saturn because it blooms later but ripens its fruit earlier! The double flowers are a delicate shell-pink, much lighter in color than those of Saturn. In full bloom the medium size tree will be the delight of your spring garden. It will delight you a second time in early summer with big, juicy, yellow-fleshed, freestone peaches. Their fine flavor, sweeter and milder than that of Saturn, will delight you yet again. Plant Pat. App. For.

\$3.50 each; 10 for \$31.50.

Yes! There's Something New Under The Sun

ARMSTRONG

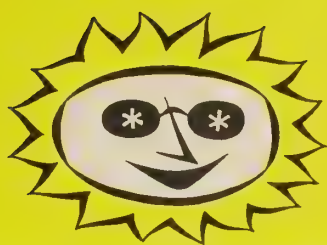

Early ripening peaches with color and quality the equal of midseason varieties, and kinds which give you showy spring bloom and high quality fruit as well, are special achievements of Armstrong fruit research. They are varieties which will perform well in nearly all areas. Now home planters in the Southwest and Deep South, as well as in the standard peach growing areas, will be glad to know they can enjoy top quality fruit from their own trees. These kinds will grow and fruit normally in mild-wintered areas (excepting Florida and south Texas) where ordinary kinds are usually unsatisfactory.

Flowers and Fruit

Thanks to the latest research work at Armstrong's, you can now enjoy fruit and flowers from the same tree. Until now, you had to plant a flowering peach to enjoy its lovely spring bloom. But for fruit, you had to plant a fruiting kind with insignificant bloom because the fruit from older flowering varieties was not edible. Now that is changed—both Saturn and Double Delight will give you clouds of spring bloom, then follow with delicious fine quality fruit. Cut all the flowers you want and prune the tree after blooming is over.

Each spring Double Delight is a garden show piece

Fruit Originations

✓ *Springtime Peach*

The first peaches of the season always taste best and this is the very first! White-fleshed and semi-free-stone, the fruit is heavily blushed with red, and the flavor is good—sweet with enough tang for enjoyable eating. Springtime will perform well in all areas of the country as far south as San Antonio, Texas, and the extreme north of Florida. Plant Pat. No. 1268.

\$3.50 each; 10 for \$31.50.

✓ *Redwing Peach*

We believe this to be one of the finest eating peaches growing anywhere. The red skin color is beautiful and the juicy white flesh has a rich flavor combining sweetness and acidity perfectly. Redwing grows fast, producing big crops on a large vigorous tree. Will perform well almost as far south as the limits suggested for Springtime. Plant Pat. No. 621.

\$3.50 each; 10 for \$31.50.

✓ *Meadow Lark*

A delicious yellow-fleshed peach ripening early, which is far better than any peach presently available for the warm-wintered areas of South Georgia, extreme Northern Florida and westward, through South-central Texas to Southern California. Adapted to areas even slightly further south than those suggested for Springtime. Plant Pat. No. 528.

\$3.00 each; 10 for \$27.00.

In July, Double Delight looks like this

Colorful fruit of Springtime

✓ *Panamint Nectarine*

A fuzzless peach with a heavenly flavor. The fruits are very colorful—almost the entire surface of the shining skin being a bright red. The yellow, freestone flesh is brimful of exhilarating nectarine flavor. Panamint will ripen big crops in mid-summer—even in areas as far south as suggested for Springtime. Plant Pat. No. 1100.

\$3.50 each; 10 for \$31.50.

Panamint Nectarine

GLORIOUS Camellias

All along the Pacific Coast and throughout the temperate South, camellias are prized garden shrubs. Their glossy ever-green foliage and exquisite winter flowers make them a welcome addition to any landscape planting.

The plants are quite hardy (0° to 10°, excepting Buddha). However, the flower buds may be injured by temperatures somewhat higher. Growers in very cold areas with a glass-house or conservatory, find growing camellias a thrilling experience. Camellias grow well in tubs or boxes which may be moved to a sheltered location during extremely cold weather.

From October 15 to April 1, we ship these plants bare root and guarantee them to reach you in perfect condition. Smaller plants are 3 years old, 1½ to 2 feet tall. Larger specimens are 5 years old, 2½ to 3 feet tall. (Some varieties will be slightly lower, more spreading.) Instructions for planting accompany each shipment.

Note:

For shipment to California points, plants may be ordered and shipped in containers with soil. In such instances, we pack them without charge, but the transportation charges are collected upon delivery.

All-America Camellias

After exhaustive tests over a 3-year period, these are the picks of the experts—the camellias judged fine enough to merit the coveted All-America Camellia Award.

Cinderella 1957 Winner

The large flower is unique in form with its rows of big wavy petals, notched and fluted at the edges. Rose-pink at the center, the petals have a lacy snowy-white border. The plant is a fine one, which seems to be quite hardy. Plant Pat. No. 1281.

\$5.00 Larger plants—\$17.50.

Buddha 1958 Winner

This newest All-America Winner is a Hybrid Reticulata originated in China. The wavy fluted petals arch inward to give the big 5 to 6 inch flower great depth. The phlox-pink color, with its veining of rose-pink, has the fascinating iridescent quality found only in Reticulatas. Very vigorous, with long lance-like foliage, the plant is more open in habit than are plants of the Japonicas. It is also less hardy (about 20°), and although proved along the Pacific Coast, may not be suitable for outdoor planting in all camellia areas. Plant Pat. No. 1215.

\$6.95 Larger plants—\$19.95.

Elegans (Chandler)

Big 6-inch blooms of rose pink splashed with white. Broad petals surround a high tuft of petaloids. Low, spreading, free blooming plant. Midseason.

Fimbriata

High-centered, snowy white, formal double, with each petal delicately fringed at the edges. Early.

Gigantea

Giant flowers with rows of petals deep red marbled with white. Big vigorous plant. Midseason.

Glen 40

A beautiful formal double with broad petals of rich red. The orange undertone makes them glow like hot coals. Midseason.

High Hat

Peony-like flowers of soft shell-pink. Sport of Daikagura. Blooms very early, often in October.

J. C. Williams

A rare English Hybrid with a single row of dawn-pink petals flaring gracefully to a 3 to 3½ inch bloom. The fast growing plant blooms heavily. Early.

Josua Youtz

White, wavy-petaled, semi-double blooms, with a tinge of pink. Plant and flower similar to Daikagura. Very early.

Lallarook

Medium size, perfect, formal double in rose pink. Vigorous plant with long slender leaves. Midseason.

Margarete Hertrich

Loveliest of the big formal white camellias. Rows of snowy wax-like petals are arranged in perfect symmetry. Midseason.

Camellias — The World's Most Cherished Winter Bloom

Alba Plena

The snowy-white, high-centered, formal double flowers never have a petal out of place and never show a stamen. It blooms early in the season.

Anita

The wide flaring petals are deep pink, striped and flecked with red. Several rows gracefully surround a compact tuft of golden stamens. A vigorous plant which blooms very freely. Early.

C. M. Hovey (Colonel Fiery)

Beautiful formal double flowers, up to 5 inches across, of glowing crimson. Blooms late.

Daikagura

The first camellia to bloom—often in early October. Large, loose, peony-like blooms of deep rose pink, sometimes blotched with white.

Debutante

The medium size, frilly double petal arrangement, and dainty shell-pink color, make this an ideal corsage flower. Early.

Donckelari

This is the giant English Donckelari with two rows of enormous, white flecked, velvety, deep red petals surrounding a tuft of golden stamens. Early.

Eleanor Hagood

A lovely high crowned formal double flower, 4 to 5 inches across. Looks just like a big Pink Perfection. Blooms late.

Mathotiana (Julia Drayton)

Huge rose-form flowers with broad overlapping petals of rich glowing red. The largest red we grow. Midseason to late.

Mrs. Charles Cobb

Large peony-like bloom of velvety dark red. Our deepest red. Does not blue with age. Midseason to late.

Pink Perfection

Everyone's favorite. Medium size formal double of light pink, with a very long blooming season.

Prince Eugene Napoleon (Pope Pius IX)

The fully double rosy-red blooms are always perfect with never an open center. Easy to grow. Early to midseason.

Princess Bacciochi

Many double peony-like blooms of velvety carmine-red and each one is perfect. Beautiful plant with fine foliage. Midseason.

Purity

Tier upon tier of wavy white petals form a large perfect bloom. Blooms late—often for Easter.

ANEMONES & RANUNCULUS

RANUNCULUS TECOLOTE GIANT

"Tecolote" Ranunculus, in the brightest of reds, oranges, yellows, and even whites, are the gayest and cheeriest of cut flowers. These are almost 100 per cent double and 2 or more inches across—the biggest and best bulbs money can buy, 1 in. and up.

12 for \$3.45; 25 for \$6.75.

ANEMONES, MONARCH DE CAEN

The finest of all Anemones are these giant, long-stemmed, single, saucer-shaped flowers in the brightest shades of rose, red, blue, purple, and lavender imaginable. They are long-lasting and a favorite for cutting with everyone. Largest premium grade bulbs, 7/8 to 1 inch.

12 for \$2.95; 25 for \$5.45.

ANEMONES AND RANUNCULUS COLLECTION

For something very colorful and pleasing, plant Anemones with the crinkly, gaily colored Ranunculus.

25 of each, all top grade bulbs, for \$10.95.

Late fall planting is best in the south and other mild areas. In colder states, bulbs are shipped for spring planting and bloom later.

1

GERBERAS

(TRANSVAAL DAISIES)

The long stemmed beauties are among the loveliest and most graceful of flowers, and these are a selected strain, the finest from many we have grown. The colors range from straw-yellow through pink and orange tones, to brilliant reds.

The showy flowers keep bursting out all summer long, nodding on wiry 18-inch stems. They are very long-lasting and excellent for cutting. Gerberas need a sunny, well-drained spot. Shipped only for spring planting, mixed colors, big bare root divisions.

3 for \$1.95; 6 for \$3.45; 12 for \$5.95.

2

ROSE PETAL JAR

OLD-FASHIONED SWEET JAR

We have rose petals—millions of them—and we've combined the most fragrant kinds with sweet smelling spices to fill an old-fashioned "Sweet Jar." The jar, 5½ inches tall, is a special creation which will fit right in with any decorative scheme. Comes in a choice of colors: *green, columbine blue, rose-pink* and *black*. Shipped anywhere in the United States postpaid.

\$4.95.

It's a gift no one could ever forget. It can be shipped for any occasion.

4

STRAWBERRIES

ROCKHILL NO. 24

Unquestionably this is the best of the everbearing types and when you have tasted one of these huge, bright red, honey-sweet berries, you will agree that it is just about the best strawberry you have ever eaten. Rockhill is ideal for the home garden because:

1. It starts bearing early and you can continue to pick fruit until late fall.
2. The good-looking foliage and lack of runners make the plants useful as an ornamental. A garden border of Rockhill plants is both attractive and fruitful.
3. With Rockhill No. 24 you will almost never find a runner and if you have grown strawberries you know that with ordinary varieties the bed is a mass of runners after the second or third season and production is lessened. The lack of runners makes the plants more expensive, but they are worth it. The best strawberry for growing in jars or barrels.

10 for \$2.50; 25 for \$5.00; 100 for \$15.00

DONNER

For quality, this new California originated berry has few equals. The coloring is even and rich, the size uniform, and the berries have a particularly delicious sweet strawberry flavor. Ripens good crops—even in its first year.

25 for \$2.00; 100 for \$6.25.
